SUMMARY

Founder of Inscribe (4,000+ installs, run solo for 3+ years) and B.Sc. Software Engineering graduate (CGPA 3.81/4.00, Ranked Top 3 in Department). Engineer coding since 2021, with 1.5+ years of professional experience building production React/TypeScript web and mobile apps, a full-stack Next.js product, a Model Context Protocol (MCP) server, and C++ systems. Track record in automated testing (Jest, Vitest), 100/100 Lighthouse performance optimization, component design systems, and AI agent workflows. Fluent in English.

EDUCATION

European University of Lefke
B.Sc. Software Engineering (High Honors)
Northern Cyprus, Graduated Jun 2026
CGPA 3.81/4.00 · Ranked Top 3 in Department · Top 4 in Faculty

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), PHP, Python, C++, C#, SQL, HTML5, CSS3/SCSS, Bootstrap
Frontend & Web: React, Next.js (App Router), React Native, TanStack Query, Tailwind CSS, Material-UI, Web Vitals Optimization
Backend & AI: Node.js, REST APIs, PostgreSQL, Model Context Protocol (MCP), LLM APIs
Testing & Tools: Vitest, Jest, React Testing Library, Git/GitHub PR Workflows, CI/CD (GitHub Actions), Linux, Agile/Scrum

EXPERIENCE

Inscribe (Browser Extension) — Remote
Founder & Frontend Engineer — 2022 – Present
- Grew a productivity browser extension solo to 4,000+ installs (React, TypeScript, Node.js, Vitest).
- Refactored legacy monolithic architecture into a modular component system; shipped local search, export (PDF, PNG, Markdown), and English/Turkish localization, fully tested with Vitest.

Ozbul Software — Famagusta, Cyprus
Software Developer — Mar 2026 – Sep 2026
- Owned frontend architecture for 2 production web apps (React, TypeScript) and 2 mobile apps (React Native) in 2-week Agile sprints.
- Architected and maintained a shared library of 25+ reusable UI components (Material-UI, Tailwind CSS) that unified styling across products.
- Wrote Jest unit tests and React Testing Library component suites, increasing test coverage by an estimated 10–20%.
- Built application server-state layers on TanStack Query for dynamic client-side caching and backend API data synchronization.

Technolink Software — Remote
Software Developer Intern — Jun 2025 – Sep 2025
- Built a Model Context Protocol (MCP) server in TypeScript that let AI agents call about 10 existing JWT-secured REST endpoints (PHP, C++) in an internal product, streamlining internal developer tools.
- Diagnosed and resolved 10+ live production issues and data pipeline bottlenecks through root-cause analysis.

Ozbul Software — Remote
Software Developer Intern — Jun 2025 – Aug 2025
- Developed 20+ responsive React and TypeScript components for a stock management app, integrating with a C# backend service.

Mensa Philosophical Circle — Remote
Frontend Developer (Startup) — Jul 2023 – Dec 2023
- Prototyped and shipped 10+ interactive web features using React, iterating weekly on member feedback to improve usability.
- Helped other developers debug and fix issues through pair review sessions.

Learning on the Go — Nigeria
Frontend Developer (Startup) — Aug 2022 – Nov 2022
- Built responsive web interfaces using JavaScript, HTML5, CSS3, and Bootstrap for an educational startup platform.
- Optimized web assets, DOM rendering, and resource loading to achieve 100/100 Lighthouse performance scores.

PROJECTS

Smart Bookmarks · *Full-Stack Next.js Application* (Live Demo | GitHub) — 2026
- Built a full-stack bookmarking web app with Next.js, PostgreSQL full-text search, Better Auth, and SSRF-safe metadata fetching.

- Integrated Claude API with structured JSON outputs to automatically analyze, categorize, and tag web pages upon ingestion.

Omniplexus · *Co-Developer, 3-Person Team* (C++, Crow, WebSockets) 2026

- Co-engineered a modular telemetry platform, owning the C++ self-generating UI runtime layer and a WebSocket backend built on the Crow C++ web framework.

ACHIEVEMENTS & COMPETITIONS

- **Teknofest (Turkey's Largest Tech Competition):** Top 1% Finalist in AI in Aviation (∼5,000 teams) & Robotics (∼4,000 teams); Top 0.5% Finalist in Tourism (∼4,000 teams).
- **Codespace x Couchbase Hackathon (2023):** 1st Place Winner out of 100 applications. Team Lead & Presenter for "Technolink", an agritech platform connecting farmers to buyers.
- **Construct AI & EMUSoft Hackathons:** Finalist (Ranked 9th of 90 teams) with MARK AI, an AI marketing agent orchestrating sub-agents.
